

# Jungle Storytime – What's that sound?

Discover the world's rainforest through a unique story

## Reception

### Learning Outcomes:

At the end of the session:

- ✓ **All pupils** will know that rainforests are places with many plants and animals, as well as a place where it rains a lot
- ✓ **Most pupils** will remember some of the animals found in rainforests
- ✓ **Some pupils** will remember at least one feature of an animal

### Curriculum Links:

Communication and Language | Understanding the World – the world

### Session Outline:

The session introduces what a rainforest is through videos. Then a strange sound is heard, which leads to the story. The story starts in the African rainforest leading to the Asian rainforest and ending with the rainforest in South America. Whilst in each of these rainforests, there is a focus on some of the animals found in the rainforest in a quest to identify the strange sound. With the use of videos, biofacts and interactive activities, key aspects of the animal's biology or behaviour will be looked at. The end of the story concludes with the discovery of the animal that was making the strange sound.

Please note, no live animals are used in this session.

## Year 1

### Learning Outcomes:

At the end of the session:

- ✓ **All pupils** will know where the main rainforests are found – Africa, Asia and South America
- ✓ **Most pupils** will remember a feature of an animal's behaviour or biology
- ✓ **Some pupils** will understand how the features of the animals help them in the rainforest
